

**Personal Statement of Medical Career and Current Goals:** My medical career can be divided into 5 multiyear divisions.

**1) Education and training** culminating in being the first USF cardiac fellow to complete training with the privilege of being named the director of the cath lab at the Tampa VA Hospital while I was still a fellow but independently funded by the Florida Heart Association. As a fellow, I received the key to the city of Tampa by the mayor for being a Founder of the Tampa Fire Rescue Program.

**2) Hospital based Academic Career** at TGH where I was the Associate Director and then Co-director of the Cardiology Center and a Founder of the University of South Florida Medical School and Hillsborough County EMS service

**3) Private Practice Group and Joint Venture** This period of my professional life was the creation of a 11 man multihospital physician's group and founding an outpatient diagnostic heart center as a Co-General partner with a Hospital and with physician limited partners.

**4) Corporate Medical Director** experience as national medical director of cardiology , education and research for a 19 acute care hospital network. Creation of a free standing Advanced Cardiac Imaging Center and training program for cardiac PET/CT, CCTA, and cardiac MRI in Tampa, Fl.

**5) Sherlock Plaque Analysis Program / AI** Curating a CCTA 5,000 case data base and creation of the Sherlock Program for predicting cardiac prognosis based on plaque morphology, composition, and function to predict cardiac events. Startup company PrivaCors to develop this concept nationally with artificial intelligence. PrivaCors has been chosen by IBM Watson Healthcare to join their 24 company collaborative to implement AI in medical imaging. Co-founded Cardio-Oncology a 501 (3) (c) and founded Cardio-Orthopaedics , a new subspecialty of cardiology to contain the cardiac risk of orthopedic TJA surgery. Promoted to USF Morsani College of Medicine Collaborative Professor. Working with the Secretary of the Navy to put CT Scanners on the Strike Force. Adjunct Professor of Joint Special Operations University. Co-developing a medical maintenance manual for Special Operations Forces Medicine.
